

Taylor County Schools

Day 4

Fifth Grade

1. Complete this packet on the fourth ICE Day.
2. Write your name on the booklet.
3. Return this completed packet after the ICE Pack Day. You will keep the others in the envelope for future ICE Pack Days.

Name: _____

Solve each problem.

$$\begin{array}{r} 1) \quad 99 \\ -79.4 \\ \hline \end{array}$$

$$\begin{array}{r} 2) \quad 336 \\ \times \quad 14 \\ \hline \end{array}$$

$$\begin{array}{r} 3) \quad 5,398 \\ \times \quad 90 \\ \hline \end{array}$$

4) Round to the nearest hundredth:
4.877

5) Round to the nearest tenth:
87.11

6) Use $<$, $>$ or $=$ to compare.
1.49 1.9

7) Use $<$, $>$ or $=$ to compare.
3.484 3.8

8) Use $<$, $>$ or $=$ to compare.
7.2 7.98

9) Insert the decimal into the answer to the problem.
 $6.519 \times 9.3 = 606267$

10) Order from small to large.
A. 4
B. 3.7
C. 3.59
D. 3.868

11) Order from small to large.
A. 7.588
B. 7.73
C. 7.71
D. 7.711

12) Answer as a mixed number (if possible).
 $\frac{1}{3} - \frac{1}{4} =$

13) $48 \overline{)3,751}$

14) $2.3 + 2.3 =$

15) Edward was trying to beat his old score of six hundred fifty-two points in a video game. If he scores exactly twenty-three points each round, how many rounds would he need to play to beat his old score?

Answers

- 1. _____ Sub17
- 2. _____ Sub15
- 3. _____ Sub15
- 4. _____ Sub14
- 5. _____ Sub14
- 6. _____ Sub13b
- 7. _____ Sub13b
- 8. _____ Sub13b
- 9. _____ Sub17
- 10. _____ Sub13b
- 11. _____ Sub13b
- 12. _____ Sub11
- 13. _____ Sub16
- 14. _____ Sub17
- 15. _____ Sub16

Explore Fun Facts about the United States

The United States has how many states? Stop and think about it. You are right if you say there are fifty states. There are forty-eight states whose borders touch each other. There are two states that do not share a border with any other state. A border is a line where one state starts and another state stops. You cross a border when you travel from one state to another. Another name for this border is "state line." Hawaii and Alaska are the two states that do not share state lines with any other states.

Hawaii is a group of islands. Islands have water on all four sides. Alaska

is not an island. It is different. Find Washington on a map. Washington is a state. Look north to find Alaska.

Alaska does not touch any other state. It touches Canada. Canada is another country. It is not in the United States.

There are many fun things you can learn about the United States. For example, Maine is the only state with only one syllable. There are not any states that begin with the letters b, c, j, q, x, y, or z. Rhode Island is the smallest state. Look at a map. Do you notice any other cool things about the United States? Each state has many neat facts. Do you know what makes your state different from all the others?

Explore Fun Facts about the United States

Questions

1. Another name that means "state line" is _____.

_____ 2. There are how many states in the United States?

- A. $50 - 2 = 48$
- B. $50 - 48 = 2$
- C. $50 = 48 - 2$
- D. $48 + 2 = 50$

_____ 3. Canada is a state in the United States.

- A. True
- B. False

_____ 4. The purpose of this passage is to _____.

- A. Encourage you to explore facts about the United States
- B. Try to get you to travel to different cities in the United States
- C. Prove there are only fifty states
- D. Explain the difference between a state and a country

Skin: The Great Protector

Your body is constantly under attack. Dirt and germs surround your body. Only one thing stands between dirt and the organs inside your body-skin.

The Largest Organ

Skin may not seem very important, but it is. It protects your body from burns, dirt, germs, and dangerous rays from the sun. It keeps fluids inside your body. And it contains all the nerves that allow you to feel things.

Skin is the largest organ in your body. If you stretched out an adult's skin into a flat sheet, it would cover an area of about 21 square feet. A square foot is a square whose sides each measure 1 foot.

Skin may cover a large area, but it is very thin. It is only about $\frac{1}{8}$ inch thick. Despite being so thin, skin is made of three layers. The outermost layer is the epidermis. Just below the outermost layer is the dermis. Beneath those two layers is the subcutaneous tissue.

The Layers

The epidermis contains a chemical called keratin. Keratin makes skin tough and waterproof. Keratin keeps germs out of your body.

The dermis is mainly made of blood vessels and nerve endings. The dermis provides the epidermis with food and oxygen.

The lowest layer, the subcutaneous tissue protects the body from blows. It also regulates the body's temperature.

All three layers of your skin protect you. Because your skin protects you, you should protect it by keeping it clean and eating a healthful diet. You should use sunblock when you are in the sun. If you take care of your skin, it will last a lifetime.

1. What does the subcutaneous tissue do to help the human body?
 - A. The subcutaneous tissue helps keep the body from getting sunburn.
 - B. The subcutaneous tissue helps to keep the body's temperature stable.
 - C. The subcutaneous tissue helps the body process food and oxygen.
 - D. The subcutaneous tissue helps keep germs out of the body.

2. Which of the following does the author describe last in the passage?
 - A. The author describes three ways that skin is helpful.
 - B. The author describes the size of skin.
 - C. The author describes the epidermis.
 - D. The author describes the three layers of skin.

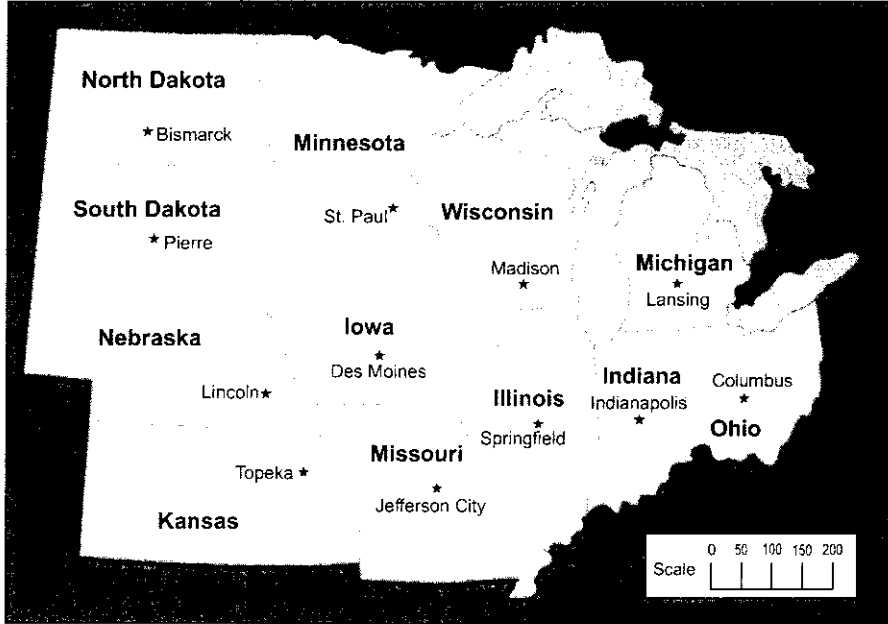

3. It can be inferred from the passage that
 - A. skin is especially helpful when it is sunny outside
 - B. there are many important organs in the body, including skin
 - C. people could not live without their skin
 - D. the dermis is the lowest layer of skin

4. Read the following sentence: "Your body is constantly under attack."
In this sentence the word **attack** means
 - A. a flat sheet of human skin that measures 21 square feet
 - B. a plan to hit someone to obtain revenge
 - C. a harmful act directed against someone or something
 - D. a bad decision that hurts someone and causes problems

5. The primary purpose of this passage is to describe
 - A. facts about human skin
 - B. facts about dirt and germs
 - C. facts about the epidermis
 - D. facts about sunblock

Miles Around the Midwest

A map *scale* shows you how far it is between two places. Look at the map of the Midwest below. Find the scale. Line up an index card or a slip of paper under the scale. Put a mark on the card for each distance shown on the scale, starting with zero. Use the card and scale to find the distances between the locations listed in the table.

	Bismarck	Pierre	St. Paul	Des Moines	Topeka	Jefferson City	Indianapolis	Madison	Lansing	Columbus	Springfield	Lincoln
Bismarck												
Pierre

DAY 4

LOGO QUIZ

Exercise 9: Do you know the brand names of the following? Write the name of the brand in the blank form with the pictures.

- () eologG _____
- () lQaim _____
- () romhCe _____
- () ngiB _____
- () oheaFokc _____
- () zmonAa _____
- () Tietrwt _____
- () oeuTYub _____
- () Spyek _____
- () yPaaPl _____
- () tWpaasph _____

- () saeatnInmg _____
- () xFirefo _____
- () ikipWedia _____
- () ndkeiLn _____
- () loahoY _____
- () pplAe _____
- () fxNalti _____
- () aHotvli _____
- () Dpoborx _____
- () yaBE _____
- () rkicFi _____

Rumors

About Nutrition and Physical Activity

Part 1:

Review these statements. Some are facts, and others are rumors that are not based on facts. Check the appropriate column based on what you have heard or learned about healthy eating and physical activity.

	Rumor, not based on fact	Fact
1. You need calories to breathe.		
2. Eating only makes you sleepy		
3. You burn calories when you sleep.		
4. Being active for 30 minutes, three times a week is the recommended goal for teens.		
5. Eating only one type of food is a good choice if it is a healthy food.		
6. Calories from some foods are better than calories from other foods.		
7. Everyone needs to use the same MyPlate to know how much of each food group to eat.		
8. Some fats are better than others.		
9. Most young people our age need to drink three cups of milk each day or eat an equivalent amount of cheese and yogurt.		
10. Most people don't eat the recommended amount of fruit, vegetables, or whole grains.		
11. There are six food groups on the new MyPlate		

List other rumors you have heard and want to know if they are facts:
